

RI TRANSPARENCY REPORT 2020

Keva

An investor initiative in partnership with UNEP Finance Initiative and UN Global Compact

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the <u>PRI website</u>, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

External FI Investments & External Equity Investments: The selection process involves both investment due diligence and operational due diligence. The latter is conducted by an external party. Investment due diligence includes both quantitative assessment (such as holdings and returns-based

analysis) as well as qualitative assessment. Asset manager meetings with an in-depth go-through of the investment cases and the underlying investment philosophy are important part of the qualitative assessment - and also the stage where ESG integration into investment analysis and decision-making, and the financial materiality impact of these decisions, is especially addressed during the selection process. Private Equity ESG is discussed during the due diligence sessions with the general partner. The most relevant aspects of ESG are discussed for the sectors that the manager is investing in. ESG policies are discussed both on portfolio company level and on the management company level. We encourage the manager to further develop and allocate resources to ESG where needed.

External Equity Investments &

Private Equity Investments

Our assessment is a holistic one rather than an assignment of pre-determined scores or weights for the factors covered in the DDQ. In our assessment we consider various aspects relating to the asset management firm, including but not limited to, investment team quality, investment philosophy, process and alignment of interests. RI considerations are a natural part of the deep, fundamental-based investment analysis for which we have appreciation in the manager selection.

AM 02.5 Describe how the ESG information reviewed and discussed affects the selection decision making process.[OPTIONAL]

External FI Investments & External Equity Investments & Private Equity Investments: We search for asset managers with a thorough understanding of the long-term industry and company drivers. ESG-related factors are no exception to this and are a natural part of the investment analysis.

🗹 Add Example 3

Topic or issue	Establishing a new quarterly reporting template
Conducted by	Internal staff
Asset class	Listed Equity
Scope and process	We created a quarterly reporting template that aims to reflect our stance as a long-term investor and partner to our managers. With our template, we are gathering information not only on the external portfolios' performance, but on characteristics, such as turnover and number of holdings. It also includes a section on portfolio financials, or "portfolio as a company". Further, we emphasized to our managers that their quarterly comments should focus on developments, processes and events during the quarter that influence long term value creation, instead of merely commenting on short-term price movements. We also included an ESG/engagements section that specifically asks managers to report on their interactions with company management; what were the issues raised, were they E, S or G related, what methods were used, who was the counterparty and what was the outcome. Finally, some firm level KPIs are included as well.
Outcomes	The template has been reviewed and agreed with almost all of our managers. Simultaneously, we asked our managers to discontinue monthly reporting.

🗹 Add Example 4

Topic or issue	Engagement and Voting Survey
Conducted by	Internal staff
Asset class	All asset classes
Scope and process	Every year external equity and fixed income investment teams conduct an ESG Survey which is targeted to Keva's external asset managers. For now two years in a row, we have focused on our asset managers' deliberate and goal-oriented influence on their portfolio companies - either through voting or engagement practices - in the pursuit of long-term value creation
	Altogether, 61 of our external equity and fixed income managers participated in the survey this time.
	The results revealed a very active use of various active ownership methods among our external asset managers. Voting activity was again very high; most managers voted in close to a 100% of cases. Over three quarters of our asset managers were involved discussions and meetings with companies or in the engagement projects. Over half of the managers collaborated with other investors.
Outcomes	Various more granular level metrics were collected from both voting and engagement activity, such as utilisation of proxy adviso votes cast for or against, top voting themes, geographical split of general meetings participated, method, lenght and outcomes or engagements undertaken as well as most common engagement themes and their respective sector biases.
	In addition, for the first time, we asked specific questions about collaborations and global frameworks, and plan to follow their acceptance as well going forward.

As can h	seen from the attached report, Keva has an aim to improve its active	e ownership processes during 2019-2020
		kset-talous-ja-raportointi/responsible-investment-by-asset-class.pdf
This pro		more concentrated portfolio than earlier enabling a more realistic startin
	incagement given the limited recourses 2) a standardization at both	n the company and the engagement frameworks (discussed above) 3) a

Active ownership and dialogue create an enabling environment to influence entities we invest in. In this case, there will also be a wider benefit from the operation for communities, the environment and financially via the more sustainable practices of the entity invested in.

In 2018, Keva become a member of IIGCC. One target of the membership is to improve our ability to engage with the companies with regards to climate. In 2019, Keva became a member of Climate Action 100+

A strategic-level description of our thinking in responsible investments in general and active ownership in particular can be found in

https://www.keva.fi/globalassets/2-tiedostot/tama-on-keva--tiedostot/sijoitukset-talous-ja-raportointi/responsible-investment-beliefs.pdf
